

Lukas A Sorensen

Lead Engineer / Systems Architect

Summary

Lead Engineer and Systems Architect with 10+ years of experience across startup, mid-sized, and contract environments. 50/50 focus on AI systems and full-stack engineering, including architecting DIGIDECK AI Assistant workflows that reduce large presentation edits from hours/days to minutes.

Core Focus

- DIGIDECK AI Assistant architecture and editor-integrated tool calling
- MCP + LangChain orchestration with Claude, OpenAI, and Ollama
- Full-stack delivery with TypeScript, Node.js, React, and platform APIs
- Observability, governance, and production-grade AI system operations

Experience Highlights

- Sportsdigita (Senior Full Stack Engineer, AI + Platform): Led DIGIDECK AI Assistant system design and delivery.
- Sportsdigita (Full Stack Engineer): Built and scaled enterprise DIGIDECK product features and integrations.
- SideShift (Architect Consultant): Defined scalable React Native architecture and handoff standards.
